# AutoSave for System Platform v5.x

**New Features and Benefits of Autosave for System Platform v5.x include:**

**AutoSave for System Platform (A4SP) 5.x runs on SP 2020 and forward, without the need for any GRAccess or DevStudio requirement.**

- **Support for System Platform 2020 (v5.00) and 2020 R2, Patch 1 (v5.01)**
  (Earlier versions, such as System Platform 2014 through 2017 Upd 3, including SP1, are still supported by the A4SP 4.x line. )
  - On SP2020 and forward, A4SP v5 runs without the need for a DevStudio to be running on the GR Node!
  - On SP2020 and forward, A4SP v5 no longer requires an additional GR Access license to run!

- **Updates available with A4SP 5.01 (released April 2021):**
  - Template containment is now tracked. For example, in the template toolbox, moving an object under another object (as a sub-object in the tree) will now trigger a new revision with this information.
  - ModifiedGraphicOnly changes are now tracked by A4SP, as indicated in the Change Log.
  - ViewAppNamespace, Widgets and ExternalContent objects created in the Graphic Toolbox are now represented in the Graphic Toolbox of the A4SP Client as expected.
  - Date/Time formats now respect the regional settings of Windows.

- **All features of A4SP v4.0 are carried forward into v5.x, including:**
  - Rename feature for Galaxies and Nodes: Moving Galaxies to new hardware, nodes or just a rename of Galaxy is now supported, while maintaining history.
  - Support for Object to Object compare: Previously, compares between an object versions was possible. Now, compares between different objects is possible.
  - Object compare between Galaxies: An object to object compare between two Galaxies supported by A4SP is now possible.
  - Galaxy Summary compare: Compare of a Galaxy to CAB (or CAB to CAB) revisions of that Galaxy is now possible, for Galaxies managed by A4SP.
  - Option to decrease warnings due to checked-out objects.
  - Improved Objects-Changed report interface.
  - Support for new attributes included in the latest release of System Platform

**The only product endorsed by AVEVA to provide change management support for System Platform**
